

REDUCE FLOATERS?

It seems like those oddly shaped particles clouding a patients' vision will never go away. That's because as we age, oxidative stress coupled with a natural decline in protective nutrients causes collagen fibers to clump together inside the vitreous. These clumps, called floaters, cast shadows on the retina and impact how your patients see the world.

VitreousHealth is the first scientifically proven formula to offer patients and eye care professionals a safe and effective way to treat floaters.

A SUPPLEMENT BACKED BY SCIENCE

Research shows that, over time, the vitreous loses certain essential antioxidants. **VitreousHealth's** patented nutrient blend replenishes the vitreous with the nutrients needed to reduce the severity of floaters.

67% OF PATIENTS RECOGNIZED IMPROVEMENTS IN THEIR SYMPTOMS WITHIN SIX MONTHS.

- ✓ 46% decrease in visual discomfort from floaters
- ✓ 47% improvement in daily visual experience
- ✓ 9% improvement in contrast sensitivity

Vitreous opacity **decreased by 70%** with supplementation
(Average decrease of 22%)

A SAFE AND EFFECTIVE TREATMENT FROM SOMEONE YOU TRUST

VitreousHealth is based on the antioxidant formulation used in the groundbreaking double-blind, placebo-controlled Floater Intervention Study (FLIES).¹

Another advancement in eye supplementation from MacuHealth, the brand eye care professionals have trusted for over a decade.
